PROFESSIONAL PROFILE

IT professional at the start of my career, with hands-on project experience in web development, databases, Linux systems and data visualisation. Skilled in building database-driven applications, implementing user access controls and troubleshooting technical issues. Seeking an opportunity to apply my technical knowledge, solve practical problems and develop within an IT team.

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL, C++

Web and applications: HTML, CSS, React, Vite, Node.js, Express, REST APIs, Tkinter

Databases and analytics: MySQL, MongoDB, MySQL Workbench, pandas, NumPy, Tableau

Systems and identity: Ubuntu Linux, VirtualBox, SSH, BIND DNS, OpenLDAP, Keycloak

Security and tools: JWT, bcrypt, role-based access control, VS Code, PowerShell, npm

SELECTED PROJECTS

Amanah Association Management Website | Personal Project | In Development

Technologies: React, Vite, Tailwind CSS, Node.js, Express, MongoDB, Mongoose, Tableau

Description: Developing an association management website with a responsive frontend and database-backed functionality. Planned features include member contribution tracking, payment confirmation and financial reporting. Used Tableau for data visualisation. Currently in development.

SITMACS IT Management and Access Control | Academic project | 2026

Technology: React, Vite, Node.js, Express, MySQL, JWT, bcrypt
Description: Developed an IT management application with secure authentication, role-based access, account approvals, login lockout, first-login password changes and session revocation. Tested authentication, access restrictions and account suspension to verify expected security behaviour.

Linux Directory and DNS Lab | Academic coursework | 2026

Technology: Ubuntu Linux, VirtualBox, OpenLDAP, BIND DNS, SSH, Keycloak
Description: Configured Ubuntu virtual machines with directory users and groups, forward and reverse DNS records, and SSH access. Validated DNS configuration and name resolution, and installed Keycloak on a separate virtual machine for identity management practice.

Python and MySQL Database Applications | Academic coursework | 2026

Technology: Python, MySQL, MySQL Workbench, Tkinter, mysql-connector-python
Description: Built a desktop application to display Northwind product records and update prices in MySQL. Used Python and SQL to analyse Chinook sales data and calculate revenue by music genre.

EDUCATION

Bachelor of Information Technology and Systems

Victorian Institute of Technology | 2025-2026 | Final results pending

Diploma of Information Technology (ICT50220)

Victorian Institute of Technology | February 2024-May 2025 | Completed

LANGUAGES

English | Bengali
